# Danish Design:

Integrated Planning, Landscape Architecture, Architecture, Furniture

Danish Design is considered some of the best and most influential in the world. From design of the countryside, to the city, park, building, furniture, and spoon, design is central to Danish culture. Through the generosity of the Scan|Design Foundation we are able to offer a 1-credit live-lecture series from Denmark, featuring some of the most innovative architects, landscape architects and furniture designers practicing in Denmark today. Bring your lunch!

1-credit Lecture/Discussion Series  
Tuesdays, Noon – 1 pm via Zoom  
Register for LArch 498C
